## Glass Shelving

“Clean, Simple, Elegant”

- 2 styles to choose from - Jade or Starfire
- Available in 1/4" and 3/8" thick
- **See below**

### Glass shelving can add a touch of elegance to your cabinets

- Shelves available in two options:
  - JADE: standard plate glass with dark green edge
  - STARFIRE: Upgraded glass with slight green edge, 60% clearer than Jade
- Highest quality edgework available
- Allows light to pass through shelves in cabinet
- Glass shelves have a premium high gloss polished edge on all 4 sides
- It is recommended that shelves over 24" be 3/8" thick - maximum 48" long
- Wall corner shelves based on 24" and 27" wall cabinets. Specific measurements required.
- **1.5 square foot minimum on shelf orders**

Visit [hdlusa.com](http://hdlusa.com) for more details and information

#### Wall corner glass shelf pricing

Shelf Thickness	Jade	Starfire
24" x 24" - 1/4" thick	\$127.75 per shelf	\$164.68 per shelf
3/8"	\$204.40 per shelf	\$241.05 per shelf
27" x 27" - 1/4" thick	\$153.30 per shelf	\$190.20 per shelf
3/8"	\$258.35 per shelf	\$295.26 per shelf

#### Square foot glass shelf pricing

Shelf Thickness	Jade	Starfire
1/4" Thick glass shelf	\$16.33 per square foot	\$41.20 per square foot
3/8" Thick glass shelf	\$52.53 per square foot	\$62.45 per square foot

- **Special Order: Shipped direct from manufacturer**
- Glass is thoroughly inspected for scratches or imperfections
- Any damage that occurs in shipping is handled by the manufacturer, Lead 'N Glass
- \$37 shipping and handling for up to 4 piece, \$5 for each additional piece after that
- All orders are final and non returnable

#### How to properly calculate square footage for pricing

Multiply the width x depth in inches (Each dimension should be rounded up to the next whole number for multiplying.) Divide the result by 144 to get the square footage. Multiply square footage x square foot price to determine the cost of each shelf. Round the dollar amount up to the next whole dollar.

Example: Shelf is 10 1/2" x 28 1/2". Multiply 11 x 29 to get 319. Divide 319 by 144 to get 2.2152777 sq. ft. Multiply 2.215277 x \$25 = \$55.39. Round up to \$56 to get total cost per shelf
